

GUARDIAN PORTABLE STERILIZER

Love . Care . Safe

HANDY, PORTABLE, LONG OPERATION HOURS!

Our guardian Portable Sterilizer is for sterilization for both slot machine areas, and hotel rooms. Its' innovative design comes with powerful UV light that can terminate bacteria and virus. In fact, the UVC light has been proven by multiple organizations, such as WHO, EPA, and CDC to be highly effective in killing bacteria and other pathogens, by scrambling their DNA or RNA which is their genetic code. Once the genetic code is broken, they can no longer function nor survive.

Our Guardian Portable Sterilizer provides the optimum 250nm – 260nm wavelength, which is the most effective wavelength needed to destroy the virus, including the COVID-19. This professional Guardian Portable Sterilizer is user-friendly, handy, mobile and has a large UVC output power.

Our Guardian Portable Sterilizer can sterilize many surfaces, for example, the Slot Machines, Slot Chairs, Elevators, Staircases, corridors, bedrooms, lavatories, public areas, and any location and space needed to be sterilized. It has a durable battery with lengthy life allowing long operation hours, and replaceable when drained so operations can be continuous.

SPECIFICATIONS

TOTAL UVC OUTPUT:	3W
BATTERY CAPACITY:	5200mA
BODY:	Aluminium
DIMENSIONS:	L 180mm x Ø 40mm
